# INTRODUCTION

## PURPOSE AND USES OF THE ECONOMIC CENSUSES

The economic censuses are the major source of facts about the structure and functioning of the Nation's economy. They provide essential information for government, business, industry, and the general public.

*Economic censuses furnish an important part of the framework for such composite measures as the gross national product, input-output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.*

*Policy-making agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.*

*State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.*

*Trade associations study trends in their own and competing industries, and keep their members informed of market changes.*

*Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.*

## AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic censuses every 5 years, covering years ending in 2 and 7. The 1987 Economic Censuses consist of the—

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Transportation
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1987 Census of Agriculture and 1987 Census of Governments are conducted separately.) The next economic censuses are scheduled to be taken in 1993 covering the year 1992.

## AVAILABILITY OF THE DATA

The results of each of the economic censuses are available in printed reports, for sale by the U.S. Government Printing Office, and on microfiche, computer tape, compact discs with read-only memory, and flexible diskettes, for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Census Bureau, Washington, DC 20233. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State Data Centers in every State and Business and Industry Data Centers in many States also supply economic census statistics.

## WHAT'S NEW IN 1987

Several changes have taken place for the 1987 censuses. Data will be reported on the basis of the newly revised Standard Industrial Classification (SIC) system with selected reports including "bridge tables," linking the old and new classification systems. A new set of metropolitan areas has been adopted, and more detailed information will be available for businesses with no paid employees. For additional information on these changes, review the subsequent text.

## HISTORICAL INFORMATION

The economic censuses have been taken together as an integrated program at 5-year intervals since 1967, and before that for 1963, 1958, and 1954. Prior to that time, the individual censuses were taken separately at varying intervals.

The economic censuses trace their beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent

Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 manufactures census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade, and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 economic censuses were the first to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. These were the first censuses to be taken by mail, using lists of firms provided by the administrative records of other federal agencies. Since 1963, administrative records have also been used to provide basic statistics as well for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic censuses, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The Census of Construction Industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The Census of Transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks. New for 1987 are publications reporting on business establishments engaged in several transportation industries, paralleling the data on establishments in other sectors. This is part of a gradual expansion in coverage of industries previously subjected to government regulation. The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic censuses in 1972 along with the Survey of Women-Owned Businesses.

Economic censuses have also been taken in Puerto Rico since 1909, in the Virgin Islands and Guam since 1958, and in the Northern Mariana Islands since 1982.

Statistical reports from the 1982 and earlier censuses provide historical figures for the study of long-term time series, and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

## AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the censuses provide complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, the results of which appear in publication series such as *Current Business Reports* (retail and wholesale trade and service industries), the *Annual Survey of Manufactures*, *Current Industrial Reports*, and the *Quarterly Financial Report*. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic

detail than the censuses. The *County Business Patterns* program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

## SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1987 Economic Censuses and Related Statistics*. More information on the methodology, procedures, and history of the censuses will be published in the *History of the 1987 Economic Censuses*. Contact Customer Services for information on availability.

## CENSUS OF SERVICE INDUSTRIES

The 1987 Census of Service Industries, part of the 1987 Economic Censuses, covered service industries as defined in Division I of the Standard Industrial Classification (SIC) Manual,<sup>1</sup> except Elementary and secondary schools (SIC 821), Colleges, universities, professional schools, and junior colleges (SIC 822), Labor unions and similar labor organizations (SIC 863), Political organizations (SIC 865), Religious organizations (SIC 866), and Private households (SIC 881). The census also excluded governmental establishments classified in the covered industries, except for government-operated hospitals which were included.

Data are presented for establishments in the following classifications:

SIC code	Title
70	Hotels, rooming houses, camps, and other lodging places
72	Personal services
73	Business services
75	Automotive repair, services, and parking
76	Miscellaneous repair services
78	Motion pictures

<sup>1</sup>Standard Industrial Classification Manual: 1987. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock no. 041-001-00314-2.

This series of reports presents data for service establishments of firms subject to Federal income tax and (in separate tables) of firms which are exempt from Federal income tax under provisions of section 501 or 521 of the Internal Revenue Code. Only establishments with some payroll during the year are included. For a more detailed explanation, see appendix A.

Many of the "kinds of business or operation" included in this report are not thought of as commercial businesses and the terms (such as "business," "establishment," and "firm") used to describe them may not be descriptive of such services, particularly for not-for-profit and professional services. However, these terms are applied to all "kinds of business or operation" to maintain conformity in the measures of the production and delivery of goods and services and in the presentation of data.

The basic tabulations in this report do not include data for establishments which are auxiliary (primary function is providing a service, such as warehousing or bookkeeping) to other establishments within the same company. Data for auxiliaries are presented in a subsequent report issued as part of the 1987 Enterprise Statistics reports.

For the 1987 Census of Service Industries, large- and medium-size firms, plus all firms known to operate more than one establishment, were sent questionnaires to be completed and returned to the Census Bureau by mail. For most very small firms, including those with no paid employees, data from existing administrative records of other Federal agencies were used instead. These records provided basic information on location, kind of business, receipts, payroll, number of employees, and legal form of organization. In addition, more detailed information for selected kinds of business was obtained on the various questionnaires.

Appendix A gives a more detailed explanation of census coverage and methodology.

## CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure, so this information may be released even though other information is withheld.

## GEOGRAPHIC AREAS COVERED

This report series presents data for the following areas:

1. The United States as a whole.
2. Each State and the District of Columbia.
3. Each consolidated metropolitan statistical area (CMSA) and primary metropolitan statistical area (PMSA) defined by the Office of Management and Budget as of June 30, 1987. A CMSA is an area used to facilitate the presentation and analysis of data for

large concentrations of metropolitan populations. It includes two or more contiguous PMSA's which have a population of at least 1,000,000<sup>2</sup> and which meet specific criteria of urban character and of social and economic integration.

4. Each metropolitan statistical area (MSA) defined by the Office of Management and Budget as of June 30, 1987. An MSA is an integrated economic and social unit with a population nucleus of at least 50,000 inhabitants.<sup>2</sup> Each MSA consists of one or more counties meeting standards of metropolitan character; in New England, cities and towns rather than counties are the component geographic units.
5. The area within the State outside metropolitan statistical areas.
6. Each county or county equivalent.<sup>3</sup> <sup>4</sup>
7. Each municipality of 2,500 inhabitants or more incorporated as a city, borough, village, or town.<sup>2</sup> <sup>3</sup>

For the economic censuses, census areas and boroughs in Alaska, boroughs in New York, and towns in New York and Wisconsin are not included in this category.

8. Special economic urban areas (SEUA's), which include townships in New Jersey and Pennsylvania and towns in New England with 10,000 inhabitants or more.<sup>2</sup>

## DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars, i.e., 1987 data are expressed in 1987 dollars and 1982 data in 1982 dollars. Consequently, when making comparisons to prior years, users of the data should consider the inflation that has occurred.

## RELIABILITY OF DATA

All data compiled in this report originated from either census questionnaires or administrative records of other Federal agencies and, therefore, are not subject to sampling errors. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, and estimation for missing or misreported data.

<sup>2</sup>According to 1980 Census of Population or subsequent special census.

<sup>3</sup>Those defined as of January 1, 1987.

<sup>4</sup>See appendix F for Alaska, Louisiana, Maryland, Missouri, Montana, Nevada, Virginia, and District of Columbia county equivalents.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained except for estimation for missing or misreported data; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

The Bureau of the Census obtains on computer tape limited information extracted from administrative records of other Federal agencies. This information is used along with other information available to the Census Bureau to develop estimates for nonemployers, small employers, and other establishments for which responses were not received in time for publication. For an indication of the extent that data included in these reports were obtained from the administrative records of other Federal agencies and from estimation, rather than reports directly from respondents, see appendix E. Also, see appendix A for a more detailed explanation of census coverage and methodology.

## SPECIAL TABULATIONS

Special tabulations of data collected in the 1987 Census of Service Industries may be obtained, depending on availability of time and personnel, on diskette, computer tape, or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Business Division, Bureau of the Census, Washington, DC 20233.

To discuss a special tabulation before submitting specifications, call 301-763-5282.

# SUMMARY OF FINDINGS

## FIRMS SUBJECT TO FEDERAL INCOME TAX

Data from the 1987 Census of Service Industries show that Connecticut's 25,756 service industries establishments of firms with payroll that were subject to Federal income tax had receipts totaling \$12.7 billion and payroll of \$4.9 billion.

For establishments with payroll, receipts of offices and clinics of medical doctors totaled \$1.3 billion. Other leading service kinds of business in 1987 were legal services with receipts of \$1.0 billion; engineering services with \$707 million; and nursing and personal care facilities with \$628 million.

Receipts per establishment averaged \$493 thousand in 1987. Computer rental and leasing services averaged \$3.7 million per establishment; linen supply services, \$2.8 million; nursing and personal care facilities, \$2.7 million; and industrial launderers, \$2.1 million.

Receipts per employee averaged \$51 thousand in 1987. Computer rental and leasing services had receipts per employee of \$336 thousand, which contrasts sharply with the \$13 thousand per employee average for help supply services.

There were 250,198 paid employees (full- and part-time) working in service industries in the State as of mid-March 1987. Help supply services had 27,147 employees; nursing and personal care facilities, 23,672 employees; and offices and clinics of medical doctors, 16,040 employees.

Fairfield County accounted for the largest percent of the total service industries receipts among all counties in the State, with 37.8 percent. Stamford had the largest receipts among all places in the State, with 11.6 percent of the State total.

## ORGANIZATIONS EXEMPT FROM FEDERAL INCOME TAX

Data from the census show that Connecticut's 2,824 service industries establishments of firms and other organizations with payroll that were exempt from Federal income tax had revenue totaling \$4.2 billion and payroll of \$2.0 billion in 1987. After adjusting for differences in the scopes of the 1982 and 1987 censuses, the percent increase in expenses was 84.1, and the percent increase in payroll was 69.6.

Revenue of hospitals totaled \$2.6 billion. Other leading classifications were civic, social, and fraternal associations with revenue of \$198 million, and individual and family social services with \$154 million.

There were 108,569 paid employees (full- and part-time) as of mid-March 1987. Hospitals had 60,422 employees; civic, social, and fraternal associations, 7,085 employees; and nursing and personal care facilities, 5,846 employees.

## APPENDIX A. General Explanation

### CENSUS COVERAGE AND METHODOLOGY

**Structure and method of enumeration**—Firms in the 1987 Census of Service Industries were divided into the nonmail universe and mail universe. The coverage and the method of obtaining census information from each follow:

1. The nonmail universe consisted of firms which were not required to file a regular census return and included:

a. All taxable nonemployers, i.e., all firms subject to Federal income tax with no paid employees during 1987. Receipts information for these firms was obtained from administrative records of other Federal agencies. Although consisting of many firms, nonemployers accounted for less than 10-percent of total receipts of all establishments covered in the census.

The census included only those service non-employer firms which reported a receipts volume of \$1,000 or more during 1987. Also included were nonemployer firms in operation for less than the full year that reported receipts which, if projected to an annual basis, would have reached a total of \$1,000 or more. Establishments exempt from Federal income tax with no paid employees were excluded as in previous censuses.

Data for nonemployers are not included in this report but are provided in a subsequent Nonemployer Statistics Series of reports (SC87-N).

b. Selected small employers, i.e., single-establishment firms with payroll below a specified cutoff. (The term "employers" refers to firms with one or more paid employees at any time during 1987 as shown in the active administrative records of other Federal agencies.) Although the payroll cutoff varied by kind of business, small employers generally included firms with 1 to 4 employees and represented about 10-percent of total receipts of establishments covered in the census.

Data on receipts, payroll, and employment for employer firms below the payroll cutoff were derived or estimated from administrative records of other Federal agencies, except for a 10-percent sample of small employer firms in classifications for which specialized data requirements precluded reliance solely on administrative records sources. This sample was included in the mail universe.

2. The mail universe consisted of firms for which information was obtained by means of a mail canvass and included:

a. Large employers, i.e., all employer firms above the size cutoff referred to in 1b. Within this category, a report of company organization is conducted periodically to identify establishment locations for firms which operated at more than one location and to obtain information on payroll and mid-March employment at each location. The 1986 Report of Company Organization was used as a coverage check in the census. In the census mailing package containing the appropriate 1987 questionnaires, multiestablishment firms also were sent a form to use in updating the list of establishments.

b. The 10-percent sample of small employer firms in classifications for which specialized data precluded reliance solely on administrative records sources. These firms were sent the census mailing packages containing the appropriate 1987 questionnaire.

**Method of classifying kinds of business**—The service industries classifications for all establishments were based on the Standard Industrial Classification (SIC) Manual.<sup>1</sup> However, the method of assigning these classifications, and the level of detail at which establishments were classified, differed between the nonmail and mail universes as follows:

1. The nonmail universe

a. Nonemployers were classified on the basis of information obtained from the administrative records of other Federal agencies.

b. Selected small employers were classified on the basis of the most current census kind-of-business classification available from one of the Bureau's current sample surveys or the 1982 census. Otherwise, the classification was obtained from the administrative records of other Federal agencies.

If the census or administrative record classifications proved inadequate (none corresponded to a 1987 census classification in the detail required

<sup>1</sup>Standard Industrial Classification Manual: 1987. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock no. 041-001-00314-2.

for employers), the firm was sent a brief inquiry requesting information necessary to assign a 1987 census kind-of-business code.

2. Establishments in the mail universe were classified on the basis of their self-designation, answers to questions on receipts by type of service provided, and other special inquiries.

**Method of assigning tax status**—For kind-of-business classifications<sup>2</sup> where there were substantial numbers of taxable and tax-exempt establishments, establishments were classified based on the Federal income tax filing requirement for the establishment or organization. This classification was based primarily on the response to an inquiry on the census questionnaire. Establishments that indicated that all or part of their income was exempt from Federal income tax under provisions of section 501 or 521 of the IRS code were classified as tax-exempt; establishments indicating no such exemption were classified as taxable. All government-operated hospitals were classified as tax-exempt. For establishments in the nonmail universe, the tax status classification was based upon the type of tax return filed by the firm or organization.

For selected kind-of-business classifications<sup>3</sup> comprised primarily of tax-exempt establishments, all establishments in those classifications were defined as tax-exempt. All establishments in the remaining kind-of-business classifications (comprised primarily of taxable establishments) were defined as taxable.

## COMPARABILITY OF THE 1982 AND 1987 CENSUSES

The 1982 and 1987 censuses were conducted under similar conditions and procedures except for the following:

**Classifications**—In 1982, kind-of-business classifications were based on the 1972 Standard Industrial Classification (SIC) Manual and its 1977 Supplement. In 1987, these classifications are based on the 1987 SIC Manual. There are major revisions to the earlier SIC structure which limit the comparability of data between the 1982 and 1987 censuses. The 1987 SIC-based kind-of-business classifications for service industries are described in detail in the "Kind-of-Business Classifications" section below, and those which have significantly changed from 1972 to 1987 are listed in appendix H.

1982 data could not be retabulated based on the revised 1987 SIC system to allow data comparability since, in many cases, information needed to assign the 1987 classifications to the 1982 records was not available. However, 1987 census records were assigned both a 1987 and 1972 SIC-based classification. Census data for 1987

<sup>2</sup>SIC's 7032, 792, 7991 pt., 7997, 7999 pt., 8011 pt., 8021 pt., 805, 806, 808, 809, 82, 83, 84 pt., 873 ex. 8733, 874 ex. 8744.

<sup>3</sup>SIC's 7041, 8111 pt., 84 pt., 86, 8733.

are presented based on the 1987 classifications for all geographic areas included in this publication (see "Geographic Areas Covered" in the Introduction). In addition, Tables 3a and 3b present data for both 1982 and 1987 based on the 1972 SIC system. Tables 4a and 4b present 1987 data for those SIC's (1972 based) that significantly changed.

**Geographic areas**—The boundaries of a number of areas for which data are shown in the 1987 census are not the same as in the 1982 census because of annexations, other boundary changes, and redefinitions of 1982 standard metropolitan statistical areas (SMSA's) and standard consolidated statistical areas (SCSA's) into metropolitan statistical areas (MSA's), primary metropolitan statistical areas (PMSA's), and consolidated metropolitan statistical areas (CMSA's).<sup>4</sup>

**Nonemployer firms**—In 1982, data for nonemployer firms and the combined data for "all establishments" (nonemployer firms plus establishments of employer firms) were published at the United States level only. Furthermore, data could not be published for several kind-of-business classifications, including the total level, because many businesses were miscoded into miscellaneous categories rather than into a specific kind of business.

For 1987, the Geographic Area Series of reports (SC87-A) only includes establishments with payroll. Data for nonemployers by kind of business are presented in the Nonemployer Statistics Series of reports (SC87-N). Data are shown for the United States, States, metropolitan statistical areas, counties, and places at varying levels of industry detail.

**Scope**—The 1987 Census of Service Industries includes Hospitals, SIC 806, whereas the 1982 census did not include this SIC Group. For 1987, hospitals operated by governmental organizations are included. Government-operated facilities in other service kind-of-business classifications are excluded from the census.

**Establishments**—In 1982 and prior censuses, the count of establishments represented the number in business at the end of the year. In 1987, the count of establishments represents those in business at any time during 1987 (regardless of operating status at the end of the year).

<sup>4</sup>Newly defined metropolitan statistical areas (MSA's) and also certain terminology changes were announced by the Office of Management and Budget (OMB) effective June 30, 1983. The previous term "standard metropolitan statistical area" was shortened to "metropolitan statistical area." If an area has more than one million population and meets certain other specified requirements, it now is termed a "consolidated metropolitan statistical area" (CMSA) and consists of major components recognized as "primary metropolitan statistical areas" (PMSA's). Many of these PMSA's were formerly recognized as SMSA's and the majority were also included in standard consolidated statistical areas (SCSA's) defined by OMB beginning in 1975, each of which consisted of two or more closely associated SMSA's. Metropolitan areas not included in CMSA's are designated simply as metropolitan statistical areas (MSA's).

A comparison of the number of establishments in business at the end of the year versus the number active any time during the year for the United States as a whole is presented in appendix G.

**Federal income tax status/kind-of-business combinations**—In both the 1982 and 1987 censuses, establishments in selected kind-of-business classifications were tabulated as taxable or tax-exempt based solely on their assigned classification, whereas establishments in other classifications were assigned tax status based on their Federal income tax filing requirement (see Method of Assigning Tax Status description of the Census Coverage and Methodology section). Three kinds of business for which tax status was assigned based on Federal income tax status filing requirements in 1982 were treated differently in 1987. Hotels (part of SIC 7011) were tabulated only as taxable in 1987. Membership organization hotels and lodging places (SIC 7041) and Noncommercial research organizations (SIC 8733) were tabulated only as tax-exempt in 1987.

## EXPLANATION OF TERMS

**Establishments**—An establishment is a single physical location at which business is conducted. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Statistics for service industries represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Estimates of this number were derived from a sample and are provided in the service industries report, Miscellaneous Subjects (SC87-S-4). Each census report was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1987.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity, and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, and when conditions prescribed by the SIC manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were obtained in the census.

Leased service departments (separately owned businesses operated as departments or concessions of other service establishments or of retail businesses, such as a

separately owned shoeshine parlor in a barber shop, or a beauty shop in a department store) are treated as separate service establishments for census purposes. Leased retail departments located in service establishments (e.g., a gift shop located in a hotel) are considered separate retail establishments.

**Firms**—A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. All establishments of subsidiary firms are included as part of the controlling firm. For the economic censuses, the terms "firm" and "company" are synonymous.

**Receipts (Basic dollar volume measure for service establishments of firms subject to Federal income tax)**—Includes receipts from customers or clients for services rendered, from the use of facilities, and from merchandise sold during 1987 whether or not payment was received in 1987, except for health practitioners and legal, architectural, engineering, and surveying services, which reported on a cash basis (payments received in 1987 regardless of when services were rendered). Excise taxes on gasoline, liquor, tobacco, etc., which are paid by the manufacturer or wholesaler and passed on in the cost of goods purchased by the service establishment, are also included. Receipts from leasing of vehicles, equipment, etc. marketed under operating leases are included in receipts figures as well as the fair sales value of merchandise marketed in 1987 under capital, finance, or "full payout" leases. Receipts also include the total value of service contracts, amounts received for work subcontracted to others, and dues and assessments from members and affiliates.

Receipts are net after deductions for refunds and allowances for merchandise returned by customers. Receipts do not include sales, occupancy, admissions, or other taxes collected from customers and remitted directly by the firm to a local, State, or Federal tax agency, nor do they include income from such sources as contributions, gifts, and grants; dividends, interest, and investments; or sale or rental of real estate. Also excluded are rents from and receipts (gross as well as the establishment's share) of departments and concessions which are operated by others; sales of used equipment rented or leased to customers; commissions from vending machine operators; and other nonoperating income such as royalties, franchise fees, etc.

Receipts in this report do not include service receipts of manufacturers, wholesalers, retail establishments, or other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sale of merchandise to individuals or other businesses) by establishments primarily engaged in performing services and classified in the service industries.

**Revenue (Basic dollar volume measure for firms exempt from Federal income tax)**—Includes revenue

## **Selected Membership Organizations (SIC's 861, 862, 864, 869)**

This group includes organizations operating on a membership basis for the promotion of the interests of their members. Also included are organizations which are not operated on a membership basis, but which promote the interests of a constituency or group of supporters. This group does not include business establishments operated by membership organizations, such as hotels open to the general public, golf and country clubs, fraternity and sorority houses, and credit unions. Such establishments are classified according to their primary activity.

Establishments of religious organizations operated for worship or for promotion of religious activities, such as churches, convents, and religious schools and missions, are classified in Industry 8661 and are out of scope of the censuses. Also excluded are Labor unions and similar labor organizations (Industry 8631) and Political organizations (Industry 8651).

**Business associations (SIC 861)**—Membership organizations engaged in promoting business interests of their members, such as better business bureaus, boards of trade, chambers of commerce, industrial standards committees, merchants' associations, real estate boards, and trade associations. Bars and restaurants owned and operated by organizations for use by members and guests only are also classified here. Hotels and lodging houses operated by organizations for use by members and their guests only, including fraternity and sorority houses, are classified in Industry 7041. **Engineering services (SIC 8711)**—Establishments primarily engaged in providing professional engineering services. **Surveying services (SIC 8713)**—Establishments primarily engaged in providing professional land, water, and aerial surveying services.

**Accounting, auditing, and bookkeeping services (SIC 8721)**—Establishments primarily engaged in furnishing accounting, bookkeeping, and related auditing services. These establishments may use data processing and tabulating techniques as part of providing their services. However, establishments primarily engaged in providing data processing and tabulating services are classified in Industry 7374. Establishments providing income tax return preparation services, without also furnishing accounting, auditing, or bookkeeping services, are classified in Industry 7291.

**Commercial physical and biological research (SIC 8731)**—Establishments primarily engaged in physical and biological research and development on a contract or fee basis. Noncommercial research establishments (funded by endowments, grants, or contributions) are classified in Industry 8733. Separate establishments of aircraft, guided missile, or spacecraft manufacturers primarily engaged in research and development on these products are classified in Manufacturing, Major Group 37.

For large geographic areas, data are presented for the following subdivisions of this classification:

1. Commercial physical research.
2. Commercial medical and biological research.

**Commercial economic, sociological, and educational research (SIC 8732)**—Establishments primarily engaged in performing business, marketing, opinion, and other economic, sociological, and educational research on a contract or fee basis. **Noncommercial research organizations (SIC 8733)**—Establishments primarily engaged in performing research into and dissemination of information for public health, education, or general welfare. These establishments primarily operate on funds from endowments, contributions, and grants. Establishments which fund such research, although the actual research may be contracted out to other establishments, are also classified here.

**Testing laboratories (SIC 8734)**—Establishments primarily engaged in providing testing services. Establishments performing clinical laboratory testing for the medical profession are classified in Industry 8071.

**Management services (SIC 8741)**—Establishments primarily engaged in furnishing general or specialized management services on a day to day basis and on a contract or fee basis. Establishments classified here do not provide operating staff. Management and operation of a business, where operating staff as well as management is provided, is classified according to the activity of the establishment managed. Construction management services are classified here.

**Management consulting services (SIC 8742)**—Establishments primarily engaged in furnishing operating counsel and assistance to managements of private, nonprofit, and public organizations. These establishments generally perform a variety of activities, such as strategic and organizational planning; financial planning and budgeting; marketing objectives and policies; information systems planning, evaluation, and selection; human resources policies and practices planning; and production scheduling and control planning.

**Public relations services (SIC 8743)**—Establishments primarily engaged in the preparation of materials, written or spoken, which are designed to promote the interests of their clients by attempting to influence the general public or other groups.

**Facilities support management services (SIC 8744)**—Establishments primarily engaged in furnishing personnel to perform a range of services in support of the operations of other establishments, or those engaged in providing a number of different continuing services, on a contract or fee basis, within other establishments. Establishments which provide management and staff to operate a business are classified according to the type of activity of the business. Establishments primarily providing one specialized service are classified in the specialized industry. Establishments primarily supplying temporary or continuing help (except agricultural) are classified in Industry 7363. Establishments which provide management services only (except agricultural) are classified in Industry 8741. Computer facilities management is classified in Industry 7376.

Included are agricultural, economic, educational, and systems engineering consultants as well as city planners and testing services (educational or personnel).

#### **Services, Not Elsewhere Classified (SIC Major Group 89)**

Establishments primarily providing services, not elsewhere classified, such as artists (excluding commercial and medical artists), authors, scientific consultants (working on their own account), inventors, lecturers, music arrangers, newspaper columnists, radio commentators, song writers, weather forecasters, and writers.

There is evidence that among small employer establishments (for which kind-of-business information is obtained from administrative records), many service establishments are classified incorrectly in this industry because there is insufficient information to determine the correct kind-of-business classification. Therefore, the published data probably overstate the number of establishments and level of activity for this category.

For large geographic areas, data are presented for the following subdivisions of this classification:

1. Scientific and related consulting services.
2. Other services, n.e.c.

**1987 CENSUS OF SERVICE INDUSTRIES****INSTRUCTIONS**

This report should be completed and returned in the preaddressed envelope provided as soon as possible, but not later than February 15, 1988. If this report does not appear to apply to your kind of business or activity, describe your business or activity in item 8 and complete the remainder of the form as accurately as possible. In most cases, completion of this form will satisfy Census requirements and eliminate further correspondence. If additional information is needed, we will either write or telephone you.

If filing by February 15 causes an undue burden, or if you have any questions, please write to the **Bureau of the Census**, 1201 East Tenth Street, Jeffersonville, IN 47134. Always include the Census File Number (number following "CFN" in address label) in all correspondence.

This report should cover calendar year 1987. If book figures are not available, estimates are acceptable.

Publications order forms for specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, DC 20233. The first results were issued in press releases. Final detailed statistics are issued in separate paperbound reports.

### Final Reports

#### Geographic area series—52 reports (SC87-A-1 to -52)

A separate paperbound report containing data for establishments with payroll is being published for each State, the District of Columbia, and the United States. For establishments of firms subject to Federal income tax, each State report presents general statistics on number of establishments, receipts, payroll, and employment, by varied service classifications, for the State, MSA's, counties, and places with 350 service establishments or more, by kind of business. Greater kind-of-business detail is shown for larger areas. In addition, for places with 2,500 inhabitants or more and for all counties, statistics are provided on number of establishments and receipts for 10 major kind-of-business groups. For establishments of firms exempt from Federal income tax, each State report presents statistics on number of establishments, revenue, payroll, and employment by varied service classifications, for the State and MSA's. Greater kind-of-business detail is shown for larger areas.

The United States Summary report presents data for the United States as a whole for establishments with payroll of firms subject to Federal income tax, as well as those exempt from Federal income tax, for detailed kind-of-business classifications. Statistics on number of establishments and receipts/revenue are also shown for States and MSA's by kind of business.

For each State, the District of Columbia, and the United States, 1987 data are provided on receipts/revenue and employees per establishment and on receipts/revenue and payroll per employee. Comparative statistics showing percent changes in receipts/expenses and payroll between 1982 and 1987 also are shown.

#### Nonemployer statistics series—4 reports (SC87-N-1 to -4)

Four separate reports are being issued, each containing data for the States located in the four different regions. Data are included by kind of business for all establishments, establishments with payroll, and establishments without payroll for the United States. Also presented are statistics for establishments without payroll on number of establishments and receipts/revenue by varied service classifications for each State and, within each State, for MSA's, counties, and places with 2,500 inhabitants or more.

#### Subject series—4 reports (SC87-S-1 to -4)
